WORK EXPERIENCE

Graduate Software Developer
2026

At PSG Financial Services I work with C# and Angular to maintain and develop applications.

Peralex Electronics Vacation Work (Software Engineering)
2025 (5 weeks)

I was tasked with developing an application for navigating the results computed by the openEMS electromagnetics solver for various antenna types.

I participated in the full agile project management process and software practices like peer reviews.

Signals and Systems II Tutor (EEE3092F)
Jan 2025 - July 2025 (6 Months)

UCT-employed tutor for their third-year signals engineering course.

Signals and Systems I Tutor (EEE2047F)
Aug 2025 - Present

UCT-employed tutor for their second-year signals engineering course.

Electrum Payments Winter Software Development Internship
2024 (4 weeks)

I was given a real company software project. I was also involved in the typical software engineering daily meetings, and company social events. In the end, I was offered a full time position. I was made a full-time job offer after the internship.

MechotronicSystems.Group Vacation work Program
2024 (4 weeks)

Investigating, simulating and prototyping systems that concern ultrasonic localisation
techniques.

UCT Control Systems Laboratory Assistant
2023&2024 (6 weeks)

Worked on the development, debugging and maintenance of the software and hardware used in a proportional gain control circuit. Used electronics knowledge, C# and PLC programming.

Computer Science Tutor (Python - CSC1015F)
2023 (6 months)

UCT-employed tutor for introductory programming course..

Computer Science Tutor (Java - CSC1016S)
2023 (6 months)

UCT-employed tutor for introduction to OOP and Java course.
